

PAS 2012 Technical Interpretation		Interpretation number	004	
Title	Calibration of inclinometers			
PAS Version	2012 : 2015			
Clause(s)	B.2.2	B.3.5	B.3.6	B.3.11
Enquiry	Is there a requirement for the inclinometer used for measuring various sloping surfaces in the vehicle (e.g. ramp and wheelchair space) to be calibrated?			
Decision	No, there is no such requirement at this point in time.			
Rationale	At this stage in the PAS implementation, the additional cost and complexity is not felt to be justified.			
Effective date	05/10/16
