

PAS 2012 Technical Interpretation		Interpretation number	008
Title	Witnessing of winch line pull tests		
PAS Version	2012 : 2015		
Clause(s)	5.6.1.2		
Enquiry	Does the winch line pull test specified in Clause 5.6.1.2 need to be witnessed or can the WAV manufacturer confirm compliance by self-certification?		
Decision	No, the line pull test does not need to be witnessed.		
Rationale	For the time being at least, the decision has been taken to allow manufacturers to self-certify, as the requirement itself still needs to be proved in the field with WAV users. It may be reviewed in the future.		
Effective date	05/10/16
